DETAILED ACTION

Rejections 35 U.S.C 102 (a) and 35 U.S.C 103 (a) of the office action mailed on 12/22/2004 have been withdrawn on claims 1-48.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-48 are rejected under 35 U.S.C 101 because they disclose a claimed invention that is an abstract idea as defined in the case *In re Warmerdam* 33, F.3d 1354, 31 USPQ2d 1754 (Fed. Cir 1994).

Analysis: Claims 1-48 are found to be in technological art since the invention is to be practiced by using a computer. Since the claims are each a series of steps to be performed on a computer the processes must be analyzed to determine whether they are statutory under 35 U.S.C. 101.

Examiner interprets that the claims are non-statutory because they are not new and depict only data structure construct for the programming language. The claims involve no more than manipulation of data structure of the program statement and to display its relationship in a hierarchical form, which is just to lay out for the memory. Therefore, claims functionality can't be realized and doesn't produce useful results. Examiner believes that applicant has not presented substance into the claims, which the claimed invention acts, and on this basis it is interpreted that applicant's invention represents a purely logical algorithm and data declarations. Therefore, claims are non-statutory and claims 1-48 are rejected under 35 U.S.C. 101.
